# CEO's Message

It has now been over a decade since Ascent Partners was founded.

The story dated back to 2008 when I was working for a local valuation firm. A family-run business, the company resorted to a dated, cumbersome management style that I increasingly demurred against.

My education background in tech convinced me that there were many more modern ways to operate an efficient business with the use of technology. Hard time it was amid the worst financial crisis since the Great Depression of the last century, I decided to start my valuation firm in a way of my own in September 2008.

I was joined by three other brave souls -- William Yuen, Paul Wu, and Hauman Yeung, whom I had had the privilege of working with professionally. Our expertise and experience of various backgrounds, ranging from industries and technologies, to environment and naturally valuation, has allowed us to form a diverse and adaptive team. This enabled us to be exceptionally agile, attentive, and responsive to the nuances and changes in the ever-growing and sophisticated business environment. The team later had the honor of having Mr. Ronald Ho, the great grandson of the late Sir Robert Hotung, as the Chairman of

the board in 2009. Ronald brought in years of management experience in professional service firms, and helped us lay the foundation for our early client pool. Sadly Ronald passed away in 2016, but his legacy his kindness and wisdom stayed on with us.

Ascent Partners was started more than ten years ago with one single vision: to flourish together with our clients, through the cultivation of reliable, long-term relationships. Since then, we have strived till this date to meet this vision as one loyal, unwavering team, with all founding members still on the same boat, as devoted as we were on the first day. As Steve Jobs put it, the only way to do great work is to love what you do, and we at Ascent Partners have found that way. The stability and devotion of our core team is what has kept Ascent Partners thriving for over a decade.

We started from square one, and we are now trusted by more than 400 leading corporations with our valuation and advisory services, from our offices in Hong Kong, Mainland China and Singapore.

Ascent Partners will continue our aspiration to fulfil our vision, by backing you and helping you achieve your goals and visions with our services.

Together, we will lift you up to reach one new height after another as you ascend to the peak.

Together, we flourish.

# Our Team

# Corporate Advisory

Your opportunity advisers.

# Sustainability Consultancy

Sustainability is the present and the future! Let us embrace this future together!

**“Today, ESG performance of corporations is an important factor that investors around the world look into when evaluating the long-term sustainability of a business. It is a global investment trend!”**

**Hauman Yeung**

**Director, Ascent Partners**

## Why do you need sustainability advisory?

When determining the long-term value of a company's security, an experienced financial analyst often asks, beside financial indicators, what other factors will differentiate this company's performance from its peers?

Under the current climate of Sustainable Development, hence calls for corporations to carry out their Corporate Social Responsibility (CSR), it is now the trend for companies that strives to remain competitive to consider their Environment, Social, and Governance (ESG) performance. Ascent Partners is in the best position to assist you in incorporating the best business practices on ESG aspects as part of your operational strategies to give you an edge amongst your competitors.

## Actions speak louder than words. Here are two cases where we assisted one of our clients in identifying occupational safety issues:

One of our client's plant had a ceiling with a height of 14-15 meters, but was only equipped with standard-sized fire extinguishers that had the range of 6 meters. If fire occurred within the facility, the employees would have been ill equipped. Therefore we advised our client to purchase high pressure fire extinguishers and measure if there was still any blind spots within the plant. We assisted our client in identifying an aspect that they did not identify.

We also advised them in improving employees' protection. The plant produced largescale steel equipment, which involves a lot of denting and hammering. This caused the noise level to reach as high as 102 - 104 db. Yet, employees were not provided with any hearing protectors. After pointing that out, the factory had started to distribute ear buds for employees who worked with noise-producing equipment.

**“Professional, appropriate, accurate, Ascent Partners meets our needs!”**

**- Mr. Aldous Li, CFO, Rosan Resources Holdings Limited**

## Let us be your Partner!

To assist you in creating and maintaining a sustainable and socially responsible business, we provide an extensive consulting service on ESG and sustainability. We will work with you to prepare an ESG and sustainability report that meets and surpasses the regulator's requirement for public disclosure.

We work closely with top international ESG reporting standard setting bodies to deliver high-standard works.

As a member of the Global Reporting Initiative (GRI) Gold Community, and as the only member of the Sustainability Accounting Standard Board (SASB) Alliance in all of Asia, our team is well versed to assist you in your Corporate and Social Responsibility needs!

We are also familiar with Climate Change Reporting Framework by Climate Disclosure Standards Board (CDSB) and the International <IR> Framework by the International Integrated Reporting Council (IIRC).

## Clients in focus

### Production plants

We helped our clients identify numerous occupational safety issues, including noise level that exceeded required standards. We gave suggestions to our client to improve their safety measures.

### F&B businesses

We assisted our clients in finding sustainable waste cooking oil collectors, who are biodiesels producers that will turn waste cooking oil into biodiesels. Biodiesels are widely recognized as fuels that can reduce carbon emissions.

“ I’ve worked with the ESG team of Ascent Partners. The team is always professional, diligent and understanding, and delivers on time. We are impressed with their great service. ”

- Ms. Kelly Li, Company Secretary, Goldbond Group Holdings Limited

# Enterprise Risk Management

**Our goal is to safeguard yours.**

## Why do you need enterprise risk management advisory?

In today's data driven world, it is important to have reliable information on risks for businesses to make the right decisions. With the volatility of the world's financial markets causing many different aspects of risk to arise, Ascent Partners will walk with you through the ever-growing minefield of risk management. We will work with you to help you identify and quantify the risk levels of your business!

## What can we offer?

We provide the following service:

- Establishment of ERM Framework under Committee of Sponsoring Organizations of the Treadway Commission ("COSO")
- Establishment of risk appetite statement, risk identification, assessment and prioritization processes
- Outsourced internal audit or assistance in the establishment of Internal Audit Function
- Review of existing internal control and risk management system under the compliance of the Corporate Governance Code and the Corporate Governance Report disclosures

# Transaction Advisory

## We master the art of the deal.

With Ascent Partner's extensive network and experience in valuation and financial advisory, we can bring the transaction professionals to you! We leverage our advantage of our versatile team and bring together the people that you will need to facilitate your decision-making process. We will deliver to you a seamless experience in planning your exit strategies from deals, developing financing arrangements, and negotiating the most favorable financing terms.

“Over the past five years, Ascent Partners has maintained a good cooperative relationship with China Yixing Industrial Park and the Yixing Municipal Government. Ascent Partners has contributed a great deal to our city's open economy by referring foreign businesses, introducing new projects, handle equity financing and helping corporations to go public. We will certainly recommend Ascent Partners to other companies.”

- Mr. Zhou Ming Xin, Yixing Bureau of Commerce

# Technology Advisory

Technology is your new growth engine.

**“ Our solid background and in-depth understanding in tech has equipped us to keep our unrivalled advantages with game-changing, state-of-the-art technologies. ”**

Paul Wu

Director, Ascent Partners

Ascent Partners aims to apply proven multidisciplinary techniques and tools to be more effective and efficient when providing services to our clients, including our existing services such as valuation. We also seek the opportunity to extend our service offering through technological innovation.

## Financial Solutions

We are a proud provider of FINCAD, the pricing and risk management solution trusted by our clients including the Big Four accounting firms.

Since 1990, FINCAD has become the industry standard in financial analytics providing derivative analytics tools and services to over 4,000 organizations around the world. With FINCAD, you will have access to the most comprehensive financial analytics library available in the industry.

## Aerial Photography

Equipped with up-to-the-minute drones and cameras, Ascent Partners is also a professional service provider of aerial photography with applications in the inspection of construction sites, land lots, high-rise buildings and other large scaled projects. The various purposes of aerial photography include measurement, site planning, progress monitoring, research and investigation.

## Patent Landscaping

Our patent landscaping service creates comprehensive overviews of patents that are pending or in place in areas of interest for our clients. A well-prepared patent landscape will offer valuable insights to our clients to support better decision making.

**“ What attracted us to FINCAD F3 was the ability to model derivatives through a generic approach. This enables us to model virtually any type of trade without relying on software updates for each instrument. ”**

**- Mr. Matthew Lynes, Portfolio Manager, Aberdeen Asset Management**
